OUR EXPERIENCES WORKING WITH FIRMAN STUDENTS

Our experience these 3 weeks has been great. We enjoyed the students many different personalities. The students are so eager to do everything; especially, to know more about us because we're someone new.

One intern, Tierra Ivy wants to own a chain of daycare facilities in the future. That's why she is working at Firman as a paid intern. She's constantly watching to see how the teachers and the administrators perform their jobs, so that she can see how things are suppose to be.

We have taught students how important reading, writing and listening are, but we also engaged the children in conversation and had fun with them playing games on a day-to-day basis. By day three, we felt that the kids warmed up to us. We hope that the kids are able to continue to show comfort and familiarity with us.

We enjoyed interacting with the 2-3 year olds and getting to know them better. We found reading and other activities were fun to do with the children to keep them busy and interested while educating them. We're looking forward to the final 3 weeks of our summer internship at Firman.
